Initiative Seminar Series presents

Theresa McClenaghan

Executive Director and Counsel, Canadian Environmental Law Association

Uncertainty and Precaution: Assessing the Proposed Deep Geological Repository (DGR) for Nuclear Waste in Ontario

**Tuesday March 3, 2015, 12:30-1:30pm.
Room HNES 142**

Ontario Power Generation has proposed to construct a “Deep Geologic Repository” for “Low and Intermediate Level” Nuclear Waste at the Bruce Nuclear site near Kincardine. The proposal has been the subject of a joint panel review by the Canadian Nuclear Safety Commission and the Canadian Environmental Assessment Agency. The process has been seen as a precursor for future proposals around the disposal of waste nuclear fuel. Ms. McClenaghan represented CELA in the joint review process, and will present her reflections on the assessment.

All are welcome
